

eProphet General Ledger

eProphet General Ledger delivers a comprehensive accounting solution designed to meet the specific needs and requirements of the QSR industry, improving your business efficiency.

Flexible Structure

There is no need to run multiple pieces of accounting software for your business, eProphet General Ledger handles complex business entity setup with shared maintenance of common suppliers but allowing consolidated reporting and processing against any or all entities.

Configurable Journals

Journals can be custom configured exactly the way you need them either as normal entry or formula based for such costs as percentage rent, advertising, system fees and payroll taxes. All entries can be easily checked by journal review and adjustment entries can be made at any time in any accounting period for the current financial year.

Budgeting

Budget forecasts can be easily created, allowing you to compare actual performance against business targets and previous year results to identify trends in all aspects of your business data.

Business Reporting

A comprehensive range of detailed reports are available including detailed and summary balance sheets, profit and loss statements and many other key totals and indicators; providing important audit trails and a snapshot into your business state by any date, period or year.

Intuitive User Workflow

Core eProphet functions are always mapped into user guided workflows that help the user perform tasks correctly and completely. Our simple interfaces allow you to reduce ramp up time of your administration staff on system operations.

Flexible Currency and Language

eProphet General Ledger can be configured to handle any currency, language and sales tax configurations to meet the needs of the business in any country.

Suite Integration

eProphet General Ledger seamlessly integrates with eProphet Payroll and Accounts Payable, automatically journalising payroll totals (such as labour costs and accruals), cash deposits and discrepancies, and supplier invoices and credits. eProphet delivers full and automated connectivity, visibility and traceability of your store operations to your P&L.

Security & Confidentiality

Abcom systems are built with strong security for your peace of mind. All interaction with the system is restricted and logged by user account, configured however you so require. Additionally, all databases, data backups and data transmissions are 128bit encrypted to prevent unauthorised access from the outside.

Robust Technology

 All eProphet systems are built using the highly acclaimed Microsoft® .NET® framework. The Microsoft® development platform is mature, robust and offers a massive range of advanced components and cutting edge functionality. In addition, adherence to strict Windows® development guidelines ensures that Abcom products offer long, productive life spans; representing a low risk, long term, quality software investment for your business.
